Hello Florian, thanks for contacting us.

Indeed, we have many other kinds of separator not included in the website (our new website is getting built at the moment). The generic PE one comes in 4-5 different thicknesses. we Also have Hipore ceramic coated ones (about 160 per roll) and even polyimide fibre separators for high temperature, which goes up to 30um. About fibreglass ones, Ive not come across them before, but let me check this and get back to you.
